

WHY CHOOSE MODEL H2?

The Eloflex model H2 is designed for users who prioritize strength, safety, and practical transport in their everyday mobility. Its aluminium alloy frame delivers the durability required for demanding daily use, while the dividable construction allows the wheelchair to be separated into two sections, making lifting and handling significantly easier without compromising sturdiness.

Built to support users up to 190 kg, the H2 is an excellent choice for heavier users who need reliable performance both indoors and outdoors. Four-wheel

damping enhances ride comfort and stability across different surfaces, while the electromagnetic brake system provides controlled, secure stopping for added safety in daily use.

Practical by design, the H2 combines high load capacity with a transport-friendly structure, making it easier to store, move, and manage in everyday situations. With its focus on strength, safety, and usability, the Eloflex model H2 offers a dependable mobility solution built to perform where it matters most.

EXTRA SPACIOUS

Model H2 is our most spacious chair with plenty of room even for those who are a bit wider or taller. Steplessly adjustable armrests, a sturdy footrest, a generous seat height and an extra-high backrest ensure maximum comfort.

LARGE WHEELS

This model features extra-strong and wide air wheels around the rim, offering superior grip and traction on any surface. This provides a more enjoyable driving experience, even when driving on uneven surfaces such as gravel roads and cobblestones.

SPLIT AT LOADING

This model offers an ingenious split design, allowing two parts to be separated quickly and easily for handy lifting into various locations like car trunks. This thoughtful design reduces the loading weight to just 19 and 23 kg for more manageable handling.

DETAILS MODEL H2

Extra Spacious Design

Generous seat dimensions, high backrest and adjustable armrests provide comfortable support for larger or taller users.

High Weight Capacity

Supports users up to 190 kg while maintaining stable, reliable performance indoors and outdoors.

Split for Easy Loading

Dividable frame separates into two parts, reducing lifting weights to about 19 and 23 kg for simpler transport.

Four Wheel Damping

Integrated suspension improves ride comfort and stability across everyday surfaces.

Large Air Filled Wheels

Wide, durable wheels deliver strong grip and smoother driving on uneven ground like gravel and cobblestones.

Adjustable Backrest

Backrest angle can be easily tilted with a hand grip for flexible and more comfortable seating positions.

Eloflex Model H2 delivers a strong, spacious and transport friendly power wheelchair built for dependable daily mobility.
